

NOAM GOLDFARB

Product Manager

*Based in Portugal | Available across Israel, US & EU time zones |
Fully available for travel to Israel & the US as needed. Open to flexible
hours for global teams.*

PM 101: show, don't tell. So I built [this](#)↗

↗ [LinkedIn Profile](#) | ↗ [+972-525662929](#) | +351-961934885 | Noamgold2@gmail.com

Product-minded operator who grew through strategy, management, and operations, 8+ years turning complex, multi-step B2B workflows into intuitive tools people actually use. I work across the product lifecycle: user research, roadmap and prioritization, and hands-on delivery alongside engineering, design, and data. I've built payment and job-costing tracking tools for construction projects and owned P&L across global eCommerce brands, so I read a workflow as its business outcome: margin, cash flow, profitability. Data-driven by default, and hands-on enough to build and ship working products myself with AI.

- **Product Thinking:** Product Discovery & User Research, Roadmapping & Prioritization, Data-Driven Decision Making, Feature Adoption & Conversion Metrics, Experimentation.
- **Workflow & Systems Thinking:** Complex Multi-Step B2B Workflows, Data Modeling, Status Transitions & Edge Cases, Process Design, Platform Logic, Job Costing.
- **Cross-Functional & UX:** Cross-Functional Collaboration (Engineering, Design, Data, Sales, Support), Customer Empathy & UX Clarity, Stakeholder Management.
- **Tools & Technical:** AI Building (Claude Code), Excel (Advanced), QuickBooks, Stripe, Jira, Productboard, Airtable, Notion, Mixpanel, Figma, GitHub, Vercel.

EXPERIENCE

Business & Strategic Consultant + Fractional Project Manager | 2022 - Present

Strategic and operational consultant for SMBs and founders, diagnosing the real bottleneck behind the stated problem, then guiding the solution to delivery, sometimes as the advisor, sometimes as the hands.

- **Payment-Tracking Tool for Construction (0-to-1):** Built a tool to track vendor payments, invoices, and change orders for a firm building luxury homes (projects worth ₪5-30M each, 40-80 vendors per project). Modeled every payment request from vendor to developer through the project manager, with clear status transitions, job-costing visibility, and a dashboard summarizing what's paid, pending, and outstanding, down to per-vendor detail. Replicated across ~15 clients.
- **Product Discovery & User Research:** Turned 120 user intake forms into a digital program shaped around real needs. Research, data analysis, then design into a frictionless flow.
- **0-to-1 Digital Product:** Designed and ran a multi-part digital program, iterating live through user feedback. Sustained 100% retention over 6+ months.

- **Systems & Data:** Designed custom management and bookkeeping systems (Excel, Airtable, Notion, QuickBooks, Stripe) with clear workflow logic and status tracking, cutting manual work and surfacing insights teams didn't know they were missing.
 - **Iterative Building:** Built and shipped my own web products end-to-end with AI (GitHub + Vercel), idea to live.
-

Brand Manager → Acting CMO | House of Brands | 2021 - 2022

Owned three global eCommerce brands end-to-end, from user insight to P&L, and led marketing and growth for the parent company. Worked directly with the CEO and the US advisory board.

- **P&L & Margin Ownership:** Owned business KPIs including checkout and payment performance across US and global markets. Drove 14-19% profit-margin improvement across all three brands.
 - **Cross-Functional Collaboration:** Partnered daily with the product teams behind two in-house SaaS platforms, and sat with finance on bookkeeping and cost structure to connect operations to margin.
 - **Experimentation & Segmentation:** Found a segment that engaged with marketing but didn't convert. Built a separate storefront to test the hypothesis. Grew the brand from \$1.5M to \$2.6M in a year, improving retention and adding 80% net-new customers.
 - **Data Visibility:** Built a metrics dashboard that gave stakeholders real-time visibility into performance. Promoted as a result.
-

Branch Manager | Performance Rock | 2019 - 2021

Promoted from front desk to Branch Manager in 3 months to launch a new flagship location.

- **0-to-1 Launch:** Launched a new branch from scratch, leading a direct team of 11 and coordinating across ~20.
 - **Data-Informed Iteration:** Beat opening-day targets, then refined operations on live usage data.
-

MILITARY & COMMUNITY LEADERSHIP

- **IDF (Elite TAGACH Unit):** Selected for the elite TAGACH unit. Post-injury, ran the Marom Brigade Commander's (Colonel) office, overseeing high-stakes scheduling, protocol, and daily operations.
 - **Boarding School Instructor & Event Producer:** Co-produced a large-scale national conference for 2,000 attendees; mentored youth in boarding school.
 - **Weizmann Institute of Science:** Selected for the 3-year "Young Researchers" multidisciplinary track.
-

Languages: Hebrew (Native), English (Highly Proficient).

Interests: Climbing, running, pickleball, drawing, silversmithing, and astrophysics.

There are always a dozen ways to do something.
The real skill is finding (or inventing) the right one.
